

Aquaglide

CHALLENGE TRACK 3

Item 58-5213220

Length ~55 ft (16.8m), Max capacity ~ 21 participants (at once)

Min Depth SS 48" (1.20m)/ Foxtrot™ 48" (1.20m)/ SS 48" (1.20m)/ SIERRA™ 57" (1.45m)/ SS 48" (1.20m)/ ZULU™ 68" (1.73m)

Despite its shallow water profile, the FOXTROT™ is a crowd favorite! A challenging balance beam, this item can also be used for head-to-head competition. Intended to fit the Short Course (25yd) pool format, this track offers amazing value with 21 person capacity and a shallower depth profile. Ultra-low profile SwimStep™ XL platforms make for easy entry at the beginning and throughout the course. The FOXTROT™ presents a significant challenge with no guarantee of staying dry! Next, the SIERRA™ presents several choices; climb, balance, wriggle or splash! Interior mesh floors create two separate splash zones. Finally, the ZULU™ slide brings it home with its five foot high ladder-style climbing wall and an exhilarating zero-entry slide.

Challenge Track 3 Technical Features

Duratex™

Commercial grade fabric reinforced PVC material.

Ideally suited for watersports, Duratex™ material is the finest, commercial grade fabric reinforced PVC available. Each Aquaglide Platinum item uses Duratex™ material for maximum strength and durability.

HA Weld™

Hot air-welded seams for high quality and outstanding durability.

'HA' or Hot Air Welding is the process used to fuse Duratex™ material seams for years of trouble-free use. HA welding produces clean, strong seams with no unsightly glue marks or splits.

RF Weld™

Radio frequency welded seams for high quality and outstanding durability.

'RF' or Radio Frequency Welding is the process used to fuse DuraTex™ material seams for years of trouble-free use. RF welding produces clean, strong seams with no unsightly glue marks or splits.

Interloc™

Heavy duty stainless fittings and convenient Interloc straps for modular use.

Aquaglide Platinum items connect to one another using the Interloc™ system. Soft webbing offers some flexibility, while remaining tough enough for years of service.

Only Interloc™ blends the convenience of a cinch with the security of a locking connection.

3 Year

Limited Warranty against any and all manufacturing defects.

Each Aquaglide Platinum™ item offers a warranty covering any and all manufacturing defects for an extended period of time. The Challenge Track3 includes a 3 Year warranty for recreational use, a 1 year warranty for commercial use.

UV Block™

Materials specially treated for high resistance to the sun's damaging rays.

Each Aquaglide Platinum item is treated with UV Block™, the highest grade 3-year UV coating available.

While we recommend periodic maintenance with additional UV coatings, there is no substitute for having UV Block™ incorporated into the material right from the start. UV Block™, for years of trouble-free use.

Aquaglide
