

# Aquaglide

## CHALLENGE TRACK 2

**Item** 58-5213210

**Length** ~55 ft (16.8m)

**Max capacity** ~ 27 participants (at once)

**Min Depth** SS 48" (1.20m)/ Tango™ 48" (1.20m)/ SS 48" (1.20m)/ DELTA™ 48" (1.20m)/ SS 48" (1.20m)/ SIERRA™ 57" (1.45m)/ SS 48" (1.20m)/ ZULU™ 68" (1.73m)

A twist on the original, this track was also designed for the Short Course (25yd) pool format, but offers a shallower depth profile with a SIERRA™ - ZULU™-zinger at the end. Maximum capacity is 27 users. The ultra-low profile SwimStep™XL platforms make for easy entry at the beginning and throughout the course. The TANGO™ will bring out the 'Tigger' in younger participants, while the DELTA™ offers an exciting splash. The challenging SIERRA™ presents several choices; climb, balance, wriggle or splash! Interior mesh floors create two separate splash zones. Finally, the ZULU™ slide brings in some 'zing' with its five foot high ladder-style climbing wall and an exhilarating zero-entry slide.

### Challenge Track 2 Technical Features

#### **Duratex™**

**Commercial grade fabric reinforced PVC material.**

Ideally suited for watersports, Duratex™ material is the finest, commercial grade fabric reinforced PVC available. Each Aquaglide Platinum item uses Duratex™ material for maximum strength and durability.

#### **HA Weld™**

**Hot air-welded seams for high quality and outstanding durability.**

'HA' or Hot Air Welding is the process used to fuse Duratex™ material seams for years of trouble-free use. HA welding produces clean, strong seams with no unsightly glue marks or splits.

#### **RF Weld™**

**Radio frequency welded seams for high quality and outstanding durability.**

'RF' or Radio Frequency Welding is the process used to fuse DuraTex™ material seams for years of trouble-free use. RF welding produces clean, strong seams with no unsightly glue marks or splits.

#### **Interloc™**

**Heavy duty stainless fittings and convenient Interloc straps for modular use.**

Aquaglide Platinum items connect to one another using the Interloc™ system. Soft webbing offers some flexibility, while remaining tough enough for years of service.

Only Interloc™ blends the convenience of a cinch with the security of a locking connection.

#### **3 Year**

**Limited Warranty against any and all manufacturing defects.**

Each Aquaglide Platinum™ item offers a warranty covering any and all manufacturing defects for an extended period of time. The Challenge Track2 includes a 3 Year warranty for recreational use, a 1 year warranty for commercial use.

#### **UV Block™**

**Materials specially treated for high resistance to the sun's damaging rays.**

Each Aquaglide Platinum item is treated with UV Block™, the highest grade 3-year UV coating available.

While we recommend periodic maintenance with additional UV coatings, there is no substitute for having UV Block™ incorporated into the material right from the start. UV Block™, for years of trouble-free use.
