Box dims:

L 58" x W 29" x H 14" 165 lb

(L 146cm x W 74cm x H 36cm) 75 kg

Capacity: 10 users - 2000 lb / 907 kg

The Ocean Pool is a portable floating pool with an 8ft (2.4m) deep mesh enclosure designed to keep out even the smallest Jellyfish and unwanted sea life. With space to lounge on the deck and swim in peace, the Ocean Pool quickly becomes the focal point of any yacht. Add Aquaglide accessories to the outside edges of the pool using Interloc attachment system. It can be anchored on its own, or used off the back of a yacht. You can also connect items on three sides with our easy to use Interloc system.

Ocean Pool Technical Features

Duratex™

Commercial grade fabric reinforced PVC material.

Ideally suited for watersports, Duratex material is the finest, commercial grade fabric reinforced PVC available. Each Aquaglide® Platinum™ item uses Duratex material for maximum strength and durability.

The Ocean Pool incorporates 1000d fabric fused with layers of 28 oz PVC.

Interloc™

Heavy duty stainless fittings and convenient Interloc straps for modular use.

Aquaglide Platinum items connect to one another using the Interloc system. Soft webbing offers some flexibility, while remaining tough enough for years of service.

Only Interloc blends the convenience of a cinch with the security of a locking connection.

UV Block™

Materials specially treated for high resistance to the sun's damaging rays.

Each Aquaglide Platinum item is treated with UV Block, the highest grade 3-year UV coating available. While we recommend periodic maintenance with additional UV coatings, there is no substitute for having UV Block incorporated into the material right from the start. UV Block, for years of trouble-free use.

3

3 Year

Limited Warranty against any and all manufacturing defects.

Each Aquaglide Platinum item offers a warranty covering any and all manufacturing defects for an extended period of time. The Ocean Pool includes a 3 Year warranty for recreational use, a 1 year warranty for commercial use.

RF Weld™

Radio frequency welded seams for high quality and outstanding durability.

'RF' or Radio Frequency Welding is the process used to fuse Duratex material seams for years of trouble-free use. RF welding produces clean, strong seams with no unsightly glue marks or splits.

HA Weld™

Hot air-welded seams for high quality and outstanding durability.

'HA' or Hot Air Welding is the process used to fuse Duratex material seams for years of trouble-free use.

HA welding produces clean, strong seams with no unsightly glue marks or splits.

EN Compliant

This product complies with all DIN EN 15649 product safety standards.

DIN EN 15649 is a rigorous product safety standard designed specifically for floating leisure items.

Dropstitch™

Combines the durability of Duratex with the lightweight strength of Spectra™ fibers to make a very high-tech, low-profile inflatable floor.

Halkey-Roberts type fitting

A specific, notched nozzle suited for Halkey-Roberts valves used on inflatable boat and commercial park products. 7/8" (21mm) OD

HD Grip™

Incorporates heavy duty molded handles for convenient boarding and/or transport.

Heavy Duty molded handles allow for convenient boarding and/or transport.

Ocean Pool Functional Features

Soak

Incorporates a soaking feature.

Play, splash or lounge in this uniquely contained soaker area. Perfect for younger children, or as a secluded getaway away from the crowd.
