(L 58cm x W 43cm x H 15cm, 14 kg)
Capacity: 3 users – 400 lb / 181 kg

The Swimstep was developed as an improvement over traditional boarding ladders which are notoriously awkward to use.

This ergonomic platform provides easy access from the water due to its low-profile design. Now available in two models to suit your ever need the basic Swimstep is a durable and cost-effective boarding solution for any item while our Swimstep XL is built exclusively with advanced Hardbottom (HB) material for exceptional long-lasting durability. The Swimstep XL is the extra-large platform that connects on 1 or 2 sides of our products using the Interloc system and the perfect platform for our ADVENTURE™ Series challenge courses.

Swimstep Series Technical Features

Duratex™

Commercial grade fabric reinforced PVC material.

Ideally suited for watersports, Duratex material is the finest, commercial grade fabric reinforced PVC available. Each Aquaglide® Platinum™ item uses Duratex material for maximum strength and durability.

The Swimstep series incorporates 1000d fabric fused with layers of 28 oz PVC.

UV Block™

Materials specially treated for high resistance to the sun's damaging rays.

Each Aquaglide Platinum item is treated with UV Block, the highest grade 3-year UV coating available. While we recommend periodic maintenance with additional UV coatings, there is no substitute for having UV Block incorporated into the material right from the start. UV Block, for years of trouble-free use.

EN Compliant

This product complies with all DIN EN 15649 product safety standards.

DIN EN 15649 is a rigorous product safety standard designed specifically for floating leisure items.

HD Grip™

Incorporates heavy duty molded handles for convenient boarding and/or transport.

Heavy Duty molded handles allow for convenient boarding and/or transport.

Interloc™

Heavy duty stainless fittings and convenient Interloc straps for modular use.

Aquaglide Platinum items connect to one another using the Interloc system. Soft webbing offers some flexibility, while remaining tough enough for years of service.

Only Interloc blends the convenience of a cinch with the security of a locking connection.

RF Weld™

Radio frequency welded seams for high quality and outstanding durability.

'RF' or Radio Frequency Welding is the process used to fuse Duratex material seams for years of trouble-free use. RF welding produces clean, strong seams with no unsightly glue marks or splits.

3 Year Limited Warranty against any and all manufacturing defects.

Each Aquaglide Platinum item offers a warranty covering any and all manufacturing defects for an extended period of time. The Swimstep series includes a 3 Year warranty for recreational use, a 1 year warranty for commercial use.

Challenge

Designed to easily integrate into a challenge course..

The Adventure Series is a select grouping of Aquaglide Platinum items designed primarily for use in challenge course tracks and circuits

Quickstrap™

This product includes Interloc™ Quickstrap™ for fast connections.

The highest grade of Interloc strap available, Quickstraps include #304 Stainless Steel buckle snap hook making connections with other items a breeze.

Swimstep Series Functional Features

Balance

Incorporates a balance feature.

Build balance skills, spar with a friend, or create a challenge course. This balance feature adds endless excitement to your Platinum aquapark.
